

SMU-X ACCT 414: ACCOUNTING ANALYTICS CAPSTONE

PROJECT STATEMENT

Lloyd's Inn is a 34-room boutique hotel located in the heart of Singapore. The team has been presented with two issues:

1. Develop a forecasting revenue management model to create a data-driven pricing strategy
2. Conduct an analysis to gain insights to re-direct guests towards direct booking and away from Online Travel Agencies (OTAs)

ISSUES IDENTIFIED

1. Pricing based on gut feeling
2. Difficulty in retrieving data for analysis
3. Partial manual data entry
4. Limited information on guest preferences

FORECASTING ALGORITHMS

Models	MAE	RMSE	MAPE	MASE
ARMA(2,2)	3.092772	3.398971	3.471817	0.9108566
Prophet	3.302815	3.919781	3.679214	0.9727165
Holt-Winters	3.561512	4.085009	3.975807	1.048906
NNETAR	3.689914	4.149924	4.194895	1.141455
TBATS	4.959638	5.159256	4.912575	1.187282
LSTM	5.198294	4.920752	4.810587	1.179858
GARCH	8.081231	9.114985	9.284552	2.91489

ARMA(2,2) had the least errors → Used to forecast demand

PRICING MODEL

Multiple Linear Regression Model

	ME	RMSE	MAE	MPE	MAPE
Test set	3.25	37.1	24.1	-1.05	11.4

Features:

- Error-catching mechanisms
- Retrieval and cancellation of records
- Forecast Singapore's occupancy rate
- Clustering analysis of hotel guests
- Suggest pricing of hotel rooms
- Automated data-entry

ANALYSIS OF INDUSTRY & GUESTS

UNSUPERVISED LEARNING: CLUSTERING
